

Cash Odds Project Description

Project Name: Cash Odds

Project Type: Mobile sports tipping and subscription platform

Prepared By: DevConnect TZ

Prepared On: 2026-04-28

Cash Odds is a mobile application built to help a sports-focused business monetize betting insights through subscriptions, premium tips, and structured user management. The platform connects subscribers, tipsters, and administrators inside one branded digital product, supported by backend APIs and payment workflows.

The current project includes a working mobile interface, authentication flows, tip publishing screens, subscription-related logic, admin management views, and payment handling. This makes Cash Odds a strong foundation for launch, commercialization, and future scale.

Project Objective

The objective of this project is to deliver a client-owned digital platform that:

- Publishes premium sports tips in a structured way
- Enables subscribers to pay for premium access
- Gives tipsters a channel to build credibility and monetize expertise
- Provides administrators with control over users, content, payments, and subscriptions
- Creates a long-term revenue asset for the client

Core Functional Scope

#User and Subscriber Features

- User registration and login
- Secure account access and profile management
- Browse recent and available betting tips
- Access premium or VIP tips through paid workflows
- View notifications and account activity
- Access help and support information

#Tipster Features

- Post and manage betting tips
- Review personal tip history
- Build a public profile presence
- Apply for account verification
- Participate in a monetized content ecosystem

#Admin Features

- Admin login and dashboard access
- Review platform activity from a central control area
- Manage users and user roles
- Manage tips and result updates
- Manage subscriptions and payment records
- Review verification and operational requests

#Product Value to the Client

Cash Odds offers the client both immediate and long-term business value:

- Establishes a branded digital revenue stream
- Reduces manual handling of premium member access
- Supports free-to-paid audience conversion
- Creates a scalable product that can grow with the business
- Improves trust through structured profiles and verification workflows
- Positions the client for future expansion into sports media, analytics, or betting insights services
